## How to delete message instagram

Image: PexelsA few weeks ago I attended a music festival with some friends. At some point, I was scrolling through Instagram Stories and then put my phone in my pocket. When I took it out a little while later I realized that I had apparently sent DMs to a number of my friends with an image of another friend’s plate of oysters.As you might imagine, this caused a bit of confusion amongst the recipients, who did not know my friend Rhianna that posted the image. And while the oysters she was enjoying in Seattle were lovely, they didn’t exactly warrant a random share.Screenshot: Instagram/ E. PriceThe good news is if you do something similar you can delete the accidental message, ideally before it’s seen by its unintentional recipient.To delete a message, just press and hold on the message you want to delete. A small pop up will appear asking if you’d like to “Copy” the message or “Unsend” it. Tap unsend.G/O Media may get a commissionAnother pop up will appear asking you to confirm you’d like to unsend the message. There you can either go through with the “Unsend” action or cancel things entirely.Screenshot: Instagram / E.PriceRemoving a message will delete it from everyone in the conversation’s screen, not just one person. The message will also be replaced with a note letting everyone know you deleted a message, so while the precise details of your failed message might not be known, the recipient will know a message once existed.It also won’t help you if your friend has already seen your message fail, except perhaps allowing you to remove the evidence and prevent future shaming. There are also instances where a sender mistakenly sends a message to the wrong person. In the age of social media, this is a common occurrence.On Facebook, you can save yourself from embarrassment by unsending a message that you’ve mistakenly typed or wrongfully sent. There’s a 10-minute time limit for it though. If you fail to unsend a message during that period, the message will permanently stay in your conversation.Speaking of which, you can also do the same if you are messaging someone via Instagram Direct. The good thing about direct messaging someone via Instagram is that you can unsend messages without the time limit. So if you want to remove a message that you’ve sent a day ago or even a week ago, you can still do so!What Happens When You Unsend a Message on Instagram?When you unsend a message on Instagram, it will no longer become visible to you and to everyone included in the conversation. It doesn’t matter if you are messaging just one person or a group, the unsend feature will work regardless. You do have to keep in mind that Instagram may still keep a copy of your deleted messages.Another thing to keep in mind is that the receiver may have already seen your message. So even if you unsend a message, they may have kept a copy of it already via screenshot or screen record. If you are sending messages that contain sensitive topics or information, it is best to always think twice or better yet, thrice before you click “Send”.Also, unlike Facebook, the photo sharing social network does not have a “remove message” option. This feature allows you to remove or delete messages but only for yourself. This means if someone sends you a message, you cannot hide or delete that particular message. You can, however, ask the sender to unsend that message. Otherwise, you’ll have to completely delete the entire conversation. If you decide to remove the entire conversation, it will no longer be visible to you but it will still be visible to the people included in the conversation.How Instagram Unsend Workflow to Unsend a Message on Instagram?Unsending a message on Instagram is pretty straightforward. Here are the steps that you need to do:Open the Instagram app on iOS (iPhone) or Android. Make sure you are already logged in to your account. Now, go ahead and tap on that airplane icon that’s sitting on the top-right corner of your feed. It will display a list of your conversations. Open a conversation and select a message that you wish to unsend. Long-press on that message and select “Unsend”. The message will be gone instantly! There will also be no signs of a message being unsend such as an unsend transcript. Once you’ve unsend a message, you can no longer restore it. Note that you cannot unsend multiple messages at once. There is no bulk unsend feature.Unsent Messages Can Still Be Reported!If you dig deeper into Instagram’s rules about how unsend works, there’s a clear notice there that if someone decides to report a chat or conversation, your unsend messages will still be included in that report provided that it is within 14 days after the message has been recalled.This means your unsend messages will not be completely taken off from Instagram’s database. You may have unsend it but it will still remain on the records for a certain period.There you have it!As already mentioned above, unsend messages will no longer become visible to you and to all the people included in the conversation. Nonetheless, this is not a foolproof way to save you from sending embarrassing photos and texts.You also need to keep in mind that you are accountable for every message you send so abusing the feature does not mean that you are completely free from any liability. For your own good, be a responsible social media user and refrain from sending messages that are considered vulgar, libelous or defamatory.This content is accurate and true to the best of the author’s knowledge and is not meant to substitute for formal and individualized advice from a qualified professional.© 2021 Kent Peligrino While Instagram is mainly a platform to post photos and videos with your followers, and to check out what’s going on in your friends’ and favorite celebrities’ lives, the social media platform also offers a feature known as Instagram Direct, which serves as Instagram’s own private messaging system.Whether you want to reply to a friend’s Instagram Story or just want to have a quick conversation with someone you follow or who follows you, Instagram Direct lets you do it. That being said, if you use Instagram Direct a lot, chances are your inbox might get a little full. If a conversation is finished and you no longer want it in your inbox, it’s possible to delete Instagram messages in a few simple steps. Here’s how to do it on your iPhone or Android. Check out the products mentioned in this article:iPhone Xs (From \$999.99 at Best Buy)Google Pixel 3 (From \$699.99 at Best Buy) How to delete private Instagram messages by deleting a conversation1. Locate the Instagram icon on your iPhone or Android’s home screen and tap to open the app. 2. In the upper right-hand corner of your screen, tap the Instagram Direct icon, which appears as a small paper plane. 3. Locate the conversation you wish to delete. On your iPhone, swipe left to reveal the Mute and Delete options. On your Android, you can reveal these options by tapping and holding on the conversation. Delete a conversation by tapping the red Delete. Jennifer Still/Business Insider 4. Tap Delete on the conversation. A pop-up will appear asking you to confirm your wish to delete the conversation. Tap Delete again to remove the conversation completely. It should be noted that deleting a conversation only removes it from your inbox. The person you had the conversation with can still see it in their own inbox unless they also delete it. You can also unsend a message on Instagram Direct rather than deleting the entire conversation. Here’s how to do it. How to delete private Instagram messages by unsending them 1. After tapping the Instagram icon on your phone’s home screen, open your Instagram Direct inbox by tapping the small paper plane icon in the upper right-hand corner of your screen. 2. Locate the conversation in which the message you wish to unsend appears and tap to open it. Tap on the message and choose to unsend it. Jennifer Still/Business Insider 3. Tap and hold the message you wish to unsend. The option to Copy or Unsend will appear above. 4. Tap Unsend and the message will disappear from the conversation. Note that if the recipient of your message has Instagram notifications turned on, they will receive a notification when you unsend a message. Otherwise, the person you’re messaging may still have seen your message before you unsend it, but it will no longer appear within the conversation for either side. Related coverage from How To Do Everything: Tech: How to delete messages on Instagram He sent a message on Instagram by mistake and now you would like to know if there is a way to delete it? Themes that someone can put their noses in the messages you sent to other users of Instagram, and for this reason, would you like to eliminate them? If you answered these questions in the affirmative, you’ve come to the right guide at the right time! With this tutorial today, in fact, we’re going to discover together how to delete messages on Instagram by acting both from a smartphone and a PC. Give me some of your free time and I will show you both the procedure to delete complete conversations and to delete individual messages. Of course, if users who you’ve sent a message have already viewed, it will not do much to delete it. Do you agree? I assure you that you will be able to erase all your messages on Instagram in a simple way, regardless of the smartphone model and the operating system you use. Enjoy reading and have fun! How to delete messages on Instagram Do you want to delete messages on Instagram, or delete all the conversations that you have entertained with other users of the social photo network? This is a fairly simple process to complete, whether you decide to act directly from the Instagram app or the Direct app. How to delete messages on Instagram – Instagram app How to delete messages on Instagram To delete the conversations from the Instagram app (officially available for Android, iOS and Windows 10 Mobile), launch it on your device, log in to your account (if required), tap the symbol of the cottage located in bottom left and then presses the airplane icon located at the top right (or on the red dot with the number corresponding to the new messages received). On Android, make a long tap on the conversation you want to delete, presses the Delete item from the menu that opens and then confirms the operation by pressing once again on the Delete item. On iOS, however, after identifying the conversation you want to delete, swipe from right to left on it and presses the red button Delete. Then confirm the operation by pressing once again on the item Delete in the box that appears. Once you have deleted the conversation, it will no longer be visible in your mail, but will still be visible to people in the chat. How to delete messages on Instagram – Direct from Instagram How to delete messages on Instagram If you’ve downloaded the Direct from Instagram app on your Android or iOS device, you can delete conversations directly from it. Start, then, Direct from Instagram pressing on its icon depicting the airplane, log in to your account (if you have already logged in to your Instagram account on your device, you should be able to simply by pressing the Continue button as user name) and, to view the latest conversations, swipe from right to left or, if you prefer, press the icon of the paper plane located at the bottom right. On Android, make a long tap on the conversation you want to delete, presses the Delete item from the menu that opens in the middle of the screen and then confirms the operation by pressing once again on the Delete item. On iOS, however, after identifying the conversation you want to delete, make a long tap on the latter, presses the Delete item in the menu that appears at the bottom and, to conclude, confirm the operation by tapping on Delete. Once you have deleted the conversation, it will no longer be visible in your mail but will still be visible to people you’ve chatted with. How to delete messages on Instagram – How to cancel sending messages on Instagram How to delete messages on Instagram Would you like to cancel sending messages on Instagram? No problem! The photographic social network integrates an ad hoc function that allows to cancel the messages sent (without paying attention to any time limit). Before explaining how to proceed, it is my duty to inform you of a couple of important aspects: at the time of writing, you can not cancel the sending of photos and videos, also deleted messages may have already been viewed by recipients. All clear? Well, let’s proceed then. How to delete messages on Instagram – Instagram app How to delete messages on Instagram To cancel the sending of a message from the Instagram app (available for both Android, iOS and Windows 10 Mobile), start the latter on your device, log in to your account (if necessary), press on the symbol of the small house located at the bottom left and then tap the airplane icon located at the top right (or on the red dot with the number located in the same position). Then perform a prolonged tap on the message you want to delete, presses the item Cancel sending the message in the menu that opens and confirms the operation by pressing once again on the item Cancel sending the message. If you delete the message immediately after sending it, you will be required to press the “Cancel sending message” button once. As for “magic”, the message will be deleted from both your account and that of the recipient and, if this has not yet displayed, you will not even notice you have received it. How to delete messages on Instagram – Direct from Instagram How to delete messages on Instagram If you’ve downloaded the Direct from Instagram app on your Android or iOS device, you can delete conversations directly from it. Start, then, Direct from Instagram pressing on its icon depicting the airplane, log in to your account (if you have already logged in to Instagram on your device, just press the Continue button as user name) and make a swipe from right to left to view the latest conversations (or tap the airplane symbol located at the bottom right). At this point, open the conversation in which there are messages you want to delete, locate the message to be deleted, make a long tap on the latter, presses on the voice Cancel sending the message in the menu that opens and confirms the operation by pressing once again on the item Cancel sending the message. If you delete the message immediately after sending it, you will not have to press twice on “Cancel sending the message”. If all went well, the message will be deleted from both your account and that of the recipient and, if he has not yet viewed it, he will not even know that he has received it. How to delete messages on Instagram – PC How to delete messages on Instagram Have you downloaded the official Instagram app on your Windows 10 PC? If you do not have your smartphone handy, you can also cancel messages from the smartphone. Let me explain how to proceed. For starters, start the Instagram app on your PC, log in to your account (if required), click on the airplane icon located at the top right and, in the Direct screen, select the conversation in which there are the messages you want to delete. At this point, make a long click on one of the messages you want to delete, click on the item Cancel sending the message in the menu that opens and confirm the operation by clicking again on the gray button Cancel sending the message. If you delete the message immediately after sending it you will not have to press twice on “Cancel sending the message”. If you have correctly performed the procedure I have just indicated to you, the message you have selected will be deleted from both your account and that of the recipient and, if you have not yet viewed it, you will not even notice that you have received it. How to delete messages on Instagram – How to delete a comment on Instagram How to delete messages on Instagram You absently left a comment to a post posted on Instagram and now you would like to know how to delete it? Also in this case the procedure you need to follow is very simple, whether you want to act as a mobile or a PC. To delete a comment on Android, start the Instagram app, log in to your account (if prompted), locate the post with the comment you want to remove and tap it again. Finally, presses the icon of the trash can located at the top right and you’re done. To delete a comment on iPhone, however, start the app of Instagram on your “iPhone”, locate the post in which there is the comment you want to delete, swipe from right to left on the comment and then presses on the symbol of white dustbin on a red background to complete the procedure. If, however, you want to delete a comment that you have posted on Instagram directly from the PC, connected to the login page of the social network, login to your account, locate the post in which the comment is in question, click on (x) placed next to the comment itself and, in the box that opens, click on the item Delete comment. Finally, to take action from the Instagram app for Windows 10, start the latter on your PC, log in to your account (if required), find the comment you want to delete and, holding down with the left mouse button on comment itself, performs a sort of swipe from right to left. Then click on the white trash icon on a red background to complete the procedure. Did you see that it was not so difficult? How to delete messages on Instagram
